REASON FOR TODAY'S CALL:
master bathroom toilet issues.

DESCRIPTION OF WORK PERFORMED:
The flapper was installed incorrectly, the fillvalve was taking a long time to refill the tank after a flush, and the shut off valve was not fully shutting the water off. I repaired the shut off valve by replacing the washer, stem, packing, packing nut, and handle. I then installed a new fillvalve & supply line, and made an adjustment to the flapper. Tested and in good working order.
