**REASON FOR TODAY'S CALL:**

I have a leak under my sink in the kitchen. I can't tell exactly where the leak comes from, but it seems to be coming from one of the connections and there is some water dripping off the drain pipe onto the bottom of the cabinet floor . The water drips after you run the water. You can't really see anything from a picture, but I took a shot with water running..

**DESCRIPTION OF WORK PERFORMED:**

The leak was coming from a cracked slipjoint nut. I replaced this nut and beveled washer and tested by filling and draining the sink multiple times. No other leaks detected.

**TECHNICIAN RECOMMENDATIONS:**

\*The drainage under the sink is piped in such a way that an S trap is created. Unfortunately, because the trap arm comes out of the wall too high, this cannot be rectified without opening the wall and setting the trap arm lower.
