REASON FOR TODAY'S CALL:  
 when washing machine drains, water spills out from the pipe which houses the hose.

DESCRIPTION OF WORK PERFORMED:  
 I used the PowerSpin drain snake to clean the laundry drain and tested by running the machine through a few fill & drain cycles with no sign of backing up.

TECHNICIAN RECOMMENDATIONS:  
 The supply hoses to the laundry machine look to be the original. I would suggest replacement of these to new braided stainless type hoses.
