REASON FOR TODAY'S CALL:

-The toilet in the master bedroom will not flush. (The second bathroom is okay.) -The base of the kitchen faucet is very loose, so I guess there is something under the sink that needs tightening. -I would also like to get a quote on replacing the kitchen sink.

DESCRIPTION OF WORK PERFORMED:

MASTER ENSUITE: The shut off valve for th toilet was not working. I repaired this valve by replacing the washer, stem, packing, packing nut, and handle. I then replaced the toilet fillvalve, flapper, and supply line. Tested and in good working order. KITCHEN: The kitchen faucet handle was loose and the nuts that secure it to the sink were also slightly loose. I tightened these loose connections and tested.

TECHNICIAN RECOMMENDATIONS:

The reason for wanting to replace the sink was due to a stained basket strainer. I suggested trying to clean it with an SOS pad. Failing that we can set up another appointment to replace it.
