REASON FOR TODAY'S CALL:  
Inspect moisture recurring in grout of master shower.

DESCRIPTION OF WORK PERFORMED:  
 June29: I removed the rough-in trim and handle to expose the rough in valve, the body spray on/off handle and trim, as well as the caulking around the 4 body spray shower heads. I first ran the body spray shower heads for a few minutes and could see no sign of leaking within the wall around the heads. I then ran the shower head and could see no sign of leaking around the rough in valve (located directly underneath the shower head) I then removed the rain shower on/off handle and trim and found signs of water leaking out of the cartridge. July12: I returned with a replacement cartridge from Cantu and installed. I tested everything before siliconging and re-installing the trim.
