REASON FOR TODAY'S CALL:
toilet not working water not filling up

DESCRIPTION OF WORK PERFORMED:

Aug1: The fillvalve was running very slow and the flapper was starting to warp, causing the water to slowly trickle out of the tank through the bowl. I replaced the fillvalve, flapper, and supply line. I noticed while onsite that the toilet was wobbly. I will have to return on another day to replace the wax seal. Aug8: I lifted the toilet and found the floor flange to be higher than usual due to the fact it is an offset flange. The centre of the toilet bowl rests on this flange instead of its outer edges. Because of this the toilet is prone to wobbling. I cleaned the area underneath the toilet and re-set with a new wax ring and braided supply line. I used rubber wedges on the outer edges of the base of the toilet bowl to help mitigate the chances of the toilet wobbling again in the future.

QTY.	CODE	DESCRIPTION	UNIT PRICE	PRICE
1		Replace Toilet FillValve, Flapper, Supply - Standard	\$169.00	\$169.00
1		Replace Toilet Wax Seal - Standard	\$189.00	\$189.00
