REASON FOR TODAY'S CALL:
Garburator jammed.

DESCRIPTION OF WORK PERFORMED:
I was able to unjam the garburator and tested by filling and draining the sink while running the garburator. Nothing was pulled out of the grinding chamber, it just seemed to have seized up due to rust. I suggested running the garburator a least once a week to mitigate the chances of rust seizing it up again and showed Norine how to unjam the garburator if it does.
