REASON FOR TODAY'S CALL:
Garburator not working.

DESCRIPTION OF WORK PERFORMED:
The garburator was jammed. I was able to unjam it and tested by filling and draining the sink multiple times while running the garburator. Nothing was pulled out of the grinding chamber, it seemed to have seized up due to rust. Before I left I informed the tenant that the garburator should be run periodically to help keep the rust from seizing it up again and showed them how to unjam it if it happens again.
