REASON FOR TODAY'S CALL:  
Leak under bathroom sink.

DESCRIPTION OF WORK PERFORMED:  
The leak was coming from where the lever arm attaches to the mechanical drain assembly. The nut that secures the lever arm was loose. I tightened this connection and during testing noticed the drain was backing up. I cleared hair from the top of the drain assembly and tested by filling and draining the sink multiple times. There are no other signs of leaking and the drain is now flowing freely.
