REASON FOR TODAY'S CALL:
 Bathtub is draining poorly and the stopper would not come off. Cold water pressure low in bathroom sink.

DESCRIPTION OF WORK PERFORMED:
 -I cleaned the tub drain using a PowerSpin drain snake and showed Jayce how to remove and reinstall the tub drain. -The Cold water shut off valve under the lavatory sink was partially turned off. I opened this valve and the pressure seems normal. -It was mentioned that during a shower water still comes out of the tub spout but with this type of spout there is always going to be a little water coming out and this amount is very small.
