REASON FOR TODAY'S CALL:

It is about my garburator. Last year about the same time you examined and fixed it by removing something that got stuck in it, and gave me a handler so whenever it happens again I could turn it from the bottom do make it up and running, but now whatever I do that it doesn't help it to turn so it keeps making that buzzing noise, so I attempted to turn it from the top and it made it turn but when I turn it off and wanted to use it again, same story again. It happens for the last week contentiously so i think it is time to change it!

DESCRIPTION OF WORK PERFORMED:

I replaced the Garburator with a new Basger5 and tested by filling and draining the sink multiple times while running the Garburator.
