REASON FOR TODAY'S CALL:
Water leaking in laundry closet during wash.

DESCRIPTION OF WORK PERFORMED:
The water was leaking directly below the laundry box. There was no water leaking from the supply lines but there was sudsy water sitting in the bottom of the laundry box. I believe the laundry drain was backing up which caused the sudsy drain water to overflow. I used the PowerSpin drain snake to clean the drain and tested.

TECHNICIAN RECOMMENDATIONS:
Whoever installed the washer/dryer used a zap strap to attach the drain hose to the hot shut supply hammer arrester. This zap strap is very tight and has caused the drain hose to kink. It is not leaking now but it may be. Good idea to have an appliance repairman have a look and replace the hose if necessary.
