REASON FOR TODAY'S CALL:

My tenant has informed me that the shower diverter is not shifting the water from the spout to the shower head (started last week and is now getting worse). She also says the garburator continuously stops working and flips the reset button. The garburator is fairly new, so there may just be something blocking it or it may be an electrical issue.

DESCRIPTION OF WORK PERFORMED:

-I replaced the tub spout with a new Delta pulldown type diverter spout and tested. -I was able to unjam the garburator and tested by filling and draining the sink multiple times while running the garburator.
