REASON FOR TODAY'S CALL:

1. Need to replace old escutcheon plate with new one. Hopefully new one fit, same grohe europlus but the new one is european version (could not find n.american version anywhere, it's been discontinued) 2. Install flange for toilet water pipe coming out from wall. 3. Adjust faucet placement on sink. currently there is a small gap and water can seep through it.

DESCRIPTION OF WORK PERFORMED:

DEC4: GUEST BATHROOM: The lavatory faucet cannot be pushed any closer to the front because the securing bracket below is already as far forward as it can go. MASTER ENSUITE: -I installed a new escutcheon for the WC Supply coming out of the wall. -The new Grohe trim kit does not fit with existing rough in valve. DEC7: I replaced the brass valve cover and installed a new Grohe Eurosmart Cosmopolitan trim. Tested and in good working order.
