REASON FOR TODAY'S CALL:
 The water valve for our washer is leaking and we would like to replace them.

DESCRIPTION OF WORK PERFORMED:
 Jan21: I wasn't able to replace all of the moving parts within the shut off valves because the securing nuts of the enclosures were seized. I was however able to add self forming graphite around the stems of the cartridges which stopped the leaking. Jan22: I replaced the laundry hoses with new braided stainless type hoses and tested by run in the machine through a fill & drain cycle.
