REASON FOR TODAY'S CALL:  
 I've looked closely at the supply line and I'm pretty sure the water is slowly coming out of the nut that's connecting the supply line to the shut off valve. It's where I know the toilet paper gets wet after I dry off the line. But also, the entire steel supply line is rusted and dirty and not sure why that is, but I'm sure you will know more =>

DESCRIPTION OF WORK PERFORMED:  
 The toilet supply line was leaking, the fillvalve was taking a long time to fill the tank after each flush, and the flapper was warping. I replaced the fillvalve, flapper, and supply line. Tested and in good working order.
