REASON FOR TODAY'S CALL:
Bathroom sink is leaking.

DESCRIPTION OF WORK PERFORMED:
-The leak under the sink was coming from a threaded connection on the mechanical drain assembly. I backed this connection off, added teflon tape to these threads, and re-tightened the connection. This stopped the leak but during testing I noticed the drain was very slow. I used the PowerSpin drain snake to clean the lavatory sink drain and tested by filling and draining the sink multiple times.
