REASON FOR TODAY'S CALL:  
Kitchen sink drain blockage.

DESCRIPTION OF WORK PERFORMED:  
The drain clean out was recessed in behind the cabinet so I cut out a section of ABS pipe just in front of the connection to the tee in the main drain. I used a PowerSpin drain snake to clean the kitchen sink drain line and used a Fernco coupling to reattach the ABS drainage. Tested by filling and draining the sink multiple times.

TECHNICIAN RECOMMENDATIONS:  
I ran the dishwasher through a short rinse and drain cycle to empty the standing water out of the machine. After the standing water was drained out, the dishwasher continued to try and drain even though it was empty. I tried changing the cycle designations but it wouldn't restart the cycle. It just continues to try and drain. I suggested letting it try to finish the cycle for 10 and if it doesn't stop trying to drain then an appliance repairman may have to be called in.

QTY.	CODE	DESCRIPTION	UNIT PRICE	PRICE
1		Clean drain using PowerSpin / Kitchen sink	\$159.00	\$159.00
1		1.5? Ferno Coupling	\$10.00	\$10.00
