REASON FOR TODAY'S CALL:

1. Kitchen faucet cartridge replacement. 2. Toilet kit replacement. I am guessing as the water refills slowly.

DESCRIPTION OF WORK PERFORMED:

-I replaced the toilet fillvalve and supply line. Tested and in good working order. -The shut off valves under the kitchen sink (connected to the faucet) were not working. I first had to repair these valves by replacing the washers, stems, packing, packing nuts, and handles. I then replaced the cartridge (K35A) within the kitchen faucet and tested. -While onsite it was mentioned the kitchen sink drain was clogged. I used a PowerSpin drain snake to clean the kitchen sink drainage and tested by filling and draining the sink multiple times.
