REASON FOR TODAY'S CALL:
Toilet not flushing properly.

DESCRIPTION OF WORK PERFORMED:
I flushed rolled up balls of toilet paper without any sign of clogging. I did however notice the toilet fillvalve was taking a very long time to fill the tank and wouldn't completely shut off when the tank was full. It is possible that if the toilet was flushed before the tank had a chance to refill it could create a clog. I replaced the FillValve and ran the 6? toilet auger through the toilet trap for good measure. Tested again by flushing large rolled up balls of toilet paper and the toilet is flushing normally.
