REASON FOR TODAY'S CALL:

Drain in laundry room overflows when the washing machine is emptying of water. It seems that the drain pipe is not able to drain water quickly enough. I did have a similar issue before and plumber cut an opening in dry wall behind washing machine to allow easier access in the future.

DESCRIPTION OF WORK PERFORMED:

I used the PowerSpin drain snake to clean the laundry drain line and tested. The drain line was congested quite far down the line and required quite a few passes.
