REASON FOR TODAY'S CALL:

-She reported that there is a leak under the kitchen sink. It also possibly be connected to the dishwasher next to it. -Bathtub & lav Sink not draining well. *park out back and call for entry.

DESCRIPTION OF WORK PERFORMED:

-The connection between the spray head and spray hose was loose. I tightened this connection. -There was also a leak coming from the ABS drainage under the sink. The P-trap union was cracked and someone tried to fix it by adding silicone to it. I repiped a portion of the ABS drainage and tested by filling and draining the sink multiple times.

TECHNICIAN RECOMMENDATIONS:

The kitchen sink is draining a little slow. To increase the flow of the drain the backflow preventer would have to be removed. I'm assuming that this backflow preventer was installed on the drain because of previous backing up of the drainage system but I can't be sure.
