REASON FOR TODAY'S CALL:
 KITCHEN FAUCET ? low water flow (the water pressure for the spray gun is high, but the water pressure for the faucet is low) ? Diverter Cartridge has failed
 SHOWER FIXTURE ? low water flow (takes more than 1 hour to fill the bath tub).

DESCRIPTION OF WORK PERFORMED:
 KITCHEN FAUCET: I installed the customer supplied diverter cartridge and tested. GUEST BATHROOM: I removed the mixing cartridge and pressure balance cartridge from the shower valve and found a lot of debris stuck in the hot port of the cartridges. This debris is coming from the building's main water supply. I flushed water through the valve before installing the new mixing and pressure balance cartridges.

TECHNICIAN RECOMMENDATIONS:
 During testing of the shower valve I found the diverter spool to be leaking while the tub is filling.
