REASON FOR TODAY'S CALL:
 I dropped a small plastic lid down my bathtub drain....now it is draining slowly...

DESCRIPTION OF WORK PERFORMED:
 -I ran the PowerSpin drain snake through the drain multiple times and the drain is now flowing freely. Unfortunately nothing was removed from the drain. The cap must have been pushed through and flushed away into the larger main drainage. -The toilet in the same bathroom was reported to be running periodically. I found the flapper to be warping. I replaced the flapper and tested.
