REASON FOR TODAY'S CALL:
Leak under kitchen sink. Toilet having issues flushing.

DESCRIPTION OF WORK PERFORMED:
 JULY18: -When I arrived there was a small amount of water in the cabinet below the sink directly underneath where the kitchen faucet spray hose hangs down. I dried the area and tested by filling and draining both sides of the sink while running the garburator with no signs of leaking. I then sprayed water around the top of the sink(where it attaches to the countertop) and still no leaking underneath. It wasn't until the water had been running for roughly 10 minutes did I notice water leaking from the faucet internally. I cannot see exactly where this water is coming from. I recommend replacement of the faucet. -The guest bathroom toilet on the main floor was running periodically. I found the flush valve gasket to be warping. I replaced this gasket and tested. Toilet seems to be flushing normally. JULY22: I delivered and installed a new kitchen faucet. Tested and in good working order.

QTY.	CODE	DESCRIPTION	UNIT PRICE	PRICE
1		Kohler Flush Valve Gasket	\$15.00	\$15.00
1		Moen Essie Faucet (Stainless Finish)	\$320.00	\$320.00
