REASON FOR TODAY'S CALL:
Upstairs bathroom faucet loose.

DESCRIPTION OF WORK PERFORMED:
-The nut that secures the faucet was loose. I tightened this nut and the faucet is now secure. The handle was also loose because the set screw that holds it into place was missing. I had an extra set screw in my van, installed it and the handle is now secure. -The hot water pressure in this faucet was super low because the hot shut off valve under the sink(connected to the faucet) is failing. To repaire this valve I will require the main water to be shut off.
