REASON FOR TODAY'S CALL:

The sink and faucet in the washroom is a little lose. It needs to be reset and re-caulked. Also, a sealant needs to be added to the counter top around the sink (if possible).

DESCRIPTION OF WORK PERFORMED:

SEP19: -I re-siliconed and secured the undermount lavatory sink and tested. -The wall mount lavatory faucet spout is secured with one set screw. Unfortunately, even when this set screw is fully tightened the spout does have some wiggle. Also I found that once removed and reinstalled the spout now leaks. OCT22: I returned with a new o-ring(received from American Standard), installed and tested.
