REASON FOR TODAY'S CALL:
 Bathroom sink faucet water is not running fully and when tried to close the water tab under the sink inside the cupboard is leaking at certain angle.

DESCRIPTION OF WORK PERFORMED:
 The shut off valves under the sink were leaking from the stems. I first repaired these valves by replacing the washers, stems, packing, packing nuts, and handles. I then installed a new aerator and tested. The pressure is back to normal and the valves are no longer leaking.
