**REASON FOR TODAY'S CALL:**  
 Garburator doesn't work. Only a slight humming sound is heard when turned on. And little sink beside dishwasher fills up and doesn't drain properly when dishwasher is in use. Must be a clog somewhere.

**DESCRIPTION OF WORK PERFORMED:**  
 I was able to get the garburator moving again by removing broken glass from within the garburator grinding chamber and tested by filling and draining the sink multiple times. I also ran the garburator through a short fill/drain cycle.
