REASON FOR TODAY'S CALL:

1. Kitchen sink faucet: the switch between the weak stream and the strong "shower" stream is defective so water is coming out both ends. 2. Shower knob that changes water between the shower and the bottom faucet is defective so again water is coming out both ends when I only want water to come out from the shower head. *call for entry 778.987.8568

DESCRIPTION OF WORK PERFORMED:

JAN8: TUB/SHOWER: The tub/shower diverter spool was wearing down internally. I installed a new diverter spool and tested. KITCHEN FAUCET: The kitchen faucet spray head is broken internally. A replacement spray head can be purchased from Pains but given the cost(around \$55), and the fact that the faucet does not swivel properly(which cannot be fixed), I suggest replacement of the entire faucet over repair. JAN17: I installed a new Moen pull-out kitchen faucet and tested.
