REASON FOR TODAY'S CALL:

-kitchen faucet leaks. -faucet in laundry room leaking -carpet wet in basement

DESCRIPTION OF WORK PERFORMED:

-replaced parts in Delta kitchen faucet. -replaced dishwasher drain coupling(connected to garburator) due to a crack that was causing a slow leak under the kitchen sink. -tightened packing nut on laundry faucet in basement. -their is no plumbing above the damp area of carpet in the basement and the drywall above and around this area is also dry.

TECHNICIAN RECOMMENDATIONS:

-before cutting open walls I suggest checking the history of the house and finding out if any dampness has been reported in the basement in the past. this could be an issue with the foundation and not a plumbing concern.
