REASON FOR TODAY'S CALL:
 -207 lav sink stopper not functioning -203 water running in shower -206 tub stopper not holding water

DESCRIPTION OF WORK PERFORMED:
 -207 removed lav drain cleared debris from inside and repaired the stopper mechanism. -203 replaced both H&C seats and Cold cartridge in shower valve. their are all new parts within the shower valve now, if this drip reoccurs the valve will have to be replaced. when replacing the valve we will have to shut down the riser to that unit as the hot shut off valve within the unit for that valve was barely working enough for me to remove the seats and will be even worse the next time we try and shut it off. -206 replaced tub drain
