REASON FOR TODAY'S CALL:
 -kitchen sink drain leaking small amounts of water. -DW not fully draining.

DESCRIPTION OF WORK PERFORMED:
 -the dishwasher couldn't drain it's contents due to the plug in the garburator drain connection not being removed during installation. i removed this plug and re-connected the dishwasher drain hose to the garburator. -after filling both sinks and draining a few times i noticed a small leak coming from one of the drainage connections. i re-piped the ABS drainage under the kitchen sink and tested.

TECHNICIAN RECOMMENDATIONS:
 -the kitchen faucet spray head has a crack in the side and is leaking when in use, this is common for this faucet. i recommend calling Grohe's customer service and inquiring about having a replacement head shipped to you under warranty.
