REASON FOR TODAY'S CALL:  
 "toilet overflowed, was clogged need to ensure all in working order"

DESCRIPTION OF WORK PERFORMED:  
 -when I arrived on site the toilet was blocked and full to the top of the bowl. I used my toilet auger to clear the blockage. After clearing the toilet blockage I flushed the toilet roughly 20 times to test the fillvalve, the float mechanism was quite sticky and during one of my test flushes got stuck in the on position meaning that the fillvalve did not turn off when the tank was full and water overflowed into the overflow tube. -I replaced this fillvalve and supply line and tested. Toilet is now in good working order.
