REASON FOR TODAY'S CALL:
 A leak in the drain pipe under the kitchen sink

DESCRIPTION OF WORK PERFORMED:
 -the drainage und the kitchen sink had come loos and fell away from sink connections. I raised this drainage up and tightened the slipjoint connections. -during testing I noticed the sink drain was actually clogged. I used our PowerSpin drain snake to clear blockage. Tested and working draining well.

TECHNICIAN RECOMMENDATIONS:
 -the drainage under the kitchen sink is fine under normal working pressure but when it was backed up a couple of the connections had a slow drip. During testing all connections were fine but in the future if any of the fittings do leak I suggest replacing all the ABS drainage under the kitchen sink.
