**REASON FOR TODAY'S CALL:**

-garburator leaking -water pooling in dishwasher -tub spout coming away from wall

**DESCRIPTION OF WORK PERFORMED:**

-found garburator to be cracked and leaking, I replaced this garburator. Once garburator was replaced I tested the dishwasher and started to drain fine. The garburator being plugged up must have been causing the backup in the dishwasher. -the tub spout mount was failing and causing it to slip away from the wall, this would have eventually fallen right off the wall. I replaced the tub spout.
