**REASON FOR TODAY'S CALL:**

"Our garburator is working but the water is not draining. When we turn the garburator on the water comes up through the next sink. We've tried the following: baking soda and vinegar in each sink. We waited 30 minutes and added hot water. This did not work. We snaked it about 4 or 5 feet. This did not work. The problem appears to be beyond the piping below the sink. We're not sure."

**DESCRIPTION OF WORK PERFORMED:**

-Unclogged kitchen drainage with PowerSpin drain snake. Filled sinks several times to test.

**TECHNICIAN RECOMMENDATIONS:**
