REASON FOR TODAY'S CALL:

-low water level in toilets. -kitchen sink drainage backing up. -tub drain stopper not functioning. -both lavatory sink drains not draining well.

DESCRIPTION OF WORK PERFORMED:

-used PowerSpin drain snake to clear kitchen sink blockage. i pulled what appeared to be stringy stems of vegetables. i informed tenant that this could have been a buildup of materials from the last tenant but to be cautious in the future when using the garburator. it is a good idea to use lots of water and little bits of food waste at a time to prevent debris from blocking drainage. -tub drain stopper mechanism was broken, i replaced tub drain trim with new lift and turn style. -both lavatory sink drain stoppers were non functional. i made adjustments to both lav drain stoppers and removed a large amount of hair from master bathroom lavatory sink.
