REASON FOR TODAY'S CALL:

"The faucet of our bathtub is sputtering when turned on, water flow is minimal and stops completely after the rapid hammering sound. Possibly air in the pipe? Or water hammer?"

DESCRIPTION OF WORK PERFORMED:

-cut access in wall behind tub. Removed cap under tub faucet and pressed the diverter cartridge "up". Tightened cap back on and tested, water flowing full force with no issues.

TECHNICIAN RECOMMENDATIONS:

-if this issue comes back I suggest we contact Danze and inquire about possible replacement parts.
