REASON FOR TODAY'S CALL:

"the trap (ubend) for the bath is leaking. we have access to that end of the bath."

DESCRIPTION OF WORK PERFORMED:

OCT25---replaced ptrap,and waste and over flow kit. OCT29---tested tub and found small drip coming from the drain connection between new piping and existing. NOV 9th- removed cremco adaptor and found small piece of debris stuck on inner wall of clamp. I removed this debris, re-connected the ptrap and tightened the cremco clamp. Filled tub 3 times and drained to test, no signs of leaking present. I placed a small Tupperware container under the tub drain and cremco connection and inserted a small water detector alarm to alert the homeowner of potential leaking before it becomes a bigger problem.

TECHNICIAN RECOMMENDATIONS:

although the tub has an inner liner that was very difficult to work with, i have subtracted hours from the total to help make the cost more reasonable. (actual hours spent on job 6)
