REASON FOR TODAY'S CALL:

-replace laundry hoses. -inspect all water supplies to ensure they are of the braided stainless type.

DESCRIPTION OF WORK PERFORMED:

Inspected supply lines to all fixtures connected to a water supply. Found that the supply lines for the KITCHEN FAUCET, 3 LAVATORY FAUCETS, and 3 TOILETS are of the braided stainless type and looked to be in good shape with no signs of corrosion or wear. The DISHWASHER SUPPLY is run in 3/8" copper and looks to be in good shape, with no signs of corrosion or wear. The FRIDGE SUPPLY is of the braided nylon type with a shut off valve located just behind the kick-plate and a short piece of 1/4" copper making the final connection both the nylon braided supply and the 1/4" copper are in good shape with no signs of corrosion or wear. The WASHING MACHINE supply hoses were the old black rubber type, we replaced these supply hoses with the braided stainless type. Found a small leak coming from the drainage under the kitchen sink, i tightened the p-trap union and tested by filling both sides of the sink and draining.
