REASON FOR TODAY'S CALL:  
 -tub drain broken. -rattling noise when tub water running.

DESCRIPTION OF WORK PERFORMED:  
 I replaced the tub drain with new lift and turn style drain.

TECHNICIAN RECOMMENDATIONS:  
 When the handle that regulates the temperature in the tub/shower is in certain positions the piping in the wall vibrates quite loudly causing the shower arm and head to shake as well. I removed the shower head to check the screens for debris but did not find any. I believe it is an issue with the shower valve cartridge itself. I have sent an email to Danze(the manufacturer of the fixture) in regards to having a replacement cartridge sent out.
