REASON FOR TODAY'S CALL:
 "Toilet not shutting off and overflowing on occasion"

DESCRIPTION OF WORK PERFORMED:
 The toilet was not clogged when I arrived but I ran the 6' toilet auger through anyway, I did not feel any obstruction. When the toilet clogged it was reported that the fill valve would not stop filling the tank which caused water to flow out of the bowl, when Louisa tried to turn the water off at the shut off valve behind the toilet the handle fell off. I replaced the toilet fill valve, flapper, and supply line. I also replaced the handle on the shut off valve so it can be easily turned off if needed in the future. I tested by flushing rolled up balls of toilet paper.

QTY.	CODE	DESCRIPTION	UNIT PRICE	PRICE
1		Replace Toilet Fill-Valve, Flapper, Supply - Standard	\$169.00	\$169.00
SUBTOTAL:				\$169.00
GST (5%):				\$8.45
TOTAL:				\$177.45
