REASON FOR TODAY'S CALL:  
"Leaking water from either kitchen sink or dishwasher."

DESCRIPTION OF WORK PERFORMED:  
When I arrived there was standing water in the dishwasher. I removed the kick plate to gain access to the underside of the dishwasher and cabinetry. Most of the dust under the cabinetry seemed to have been completely dry with no signs of past moisture. The concrete under the left front corner of the dishwasher however appears to have had moisture and the dust is stained and crusted. I believe that the dishwasher overflowed from the front, to the underside of the cabinetry and under the flooring to the left. I tested the sink drainage by filling and draining both sides 3 times and it is draining fine so I'm not sure why it would have overflowed.

TECHNICIAN RECOMMENDATIONS:  
I suggest having an Appliance repairman inspect the dishwasher to ensure that it is ok to use without fear of future overflowing. Lucas Appliance: 604.880.4367
