REASON FOR TODAY'S CALL:  
 -tub spout diverter not fully diverting water. -inspect washer/dryer connections.

DESCRIPTION OF WORK PERFORMED:  
 --The tub spout seemed to be in good working order. A small amount of water coming out of the tub spout when the shower is activated is to be expected. -The dryer vent connection was not made. I made a trip to Home Depot, purchased a flexible vent hose kit and installed it. Tested water and drain connections and moved the washer dryer to a position that opened up the most space in the storage closet and allowed for easier access to the shut off valve in case they were ever needed.
