REASON FOR TODAY'S CALL:
 -kitchen faucet leaking.

DESCRIPTION OF WORK PERFORMED:
 The kitchen faucet was leaking from a few different spots, I replaced the faucet with a new Delta Palo. The hot shut off valve under the kitchen sink wasn't fully shutting the flow of water off so to allow for removal of the old faucet I installed a retro stop on the old shut off valve.

TECHNICIAN RECOMMENDATIONS:
 I was asked to look at the laundry shut off valves but they are sandwiched in between the laundry machine and the wall. If it is possible please send me the comments made by the appliance installer so I can understand fully what they noticed during installation.
