REASON FOR TODAY'S CALL:

Several problems: 1) Bathroom sink does not drain properly 2) Toilet periodically makes an unusual sound similar to a running toiler but different. It comes and goes randomly, not necessarily after flushing 3) Water is either scalding hot or cold/lukewarm

DESCRIPTION OF WORK PERFORMED:

TOILET---Replaced toilet fillvave, FlushValve gasket, and supply line. SHOWER---I removed the pressure balancing spool, cleared debris from the screen(Hansgrohe TB-2), and reinstalled. If the problem persists a new pressure balancing spool will have to be ordered from Hansgrohe. LAVATORY--- The drain stopper was set very low, I set it higher and tested, now draining freely.
