REASON FOR TODAY'S CALL:
 leak under kitchen sink when in use.

DESCRIPTION OF WORK PERFORMED:
 The dishwasher drain hose was not secured to the barbed connection on the drainage under the kitchen sink. I attached the drain hose and tested by filling both sides of the sink & draining, and running the dishwasher through a short fill and drain cycle.

TECHNICIAN RECOMMENDATIONS:
 It is important to note that when I went to attach the dishwasher drain hose to the drainage under the sink I had to loosen the gear clamp which means it must have but tightened back on the drain at some point, but it is possible it was tightened to the very tip of the barbed drain connection and slipped off.
