REASON FOR TODAY'S CALL:
 -low pressure in kitchen faucet.

DESCRIPTION OF WORK PERFORMED:

Feb5---faucet had very low pressure and was leaking through the cartridge and out of the handle when in use. I removed the cartridge and noticed quite a lot of debris within the housing. I removed this debris and replaced the cartridge with new. I disconnected the hot and cold supply lines and flushed debris out of each, reconnected and tested. The pressure is full now but the spray head leaks when in use. I will have to order a new spray head from Paini. Feb21---delivered and installed new spray head. Tested; full pressure and no leaks present.
