REASON FOR TODAY'S CALL:
 Leak in kitchen sink and reseal of under-mount sink.

DESCRIPTION OF WORK PERFORMED:
 -Resiliconed and secured undermount kitchen sink. -the garburator had cracks in the housing which allowed water to seep out, I replaced the garburator with a new Badger 5 and tested by filling both sides of the sink and draining twice.

TECHNICIAN RECOMMENDATIONS:
 I noticed while working under the sink that the instant hot water unit had a small leak from the bottom of the unit. The unit is leaking internally and will have to be replaced. For now I have turned the water supply valve off, drained the water from the unit, and unplugged the power.
